

English, 2007 EC, entrance exam

Grade 12 · English · 2007 E.C.

Time allowed: 120 minutes

Questions: 113

Total marks: 113

Name _____ Grade _____ ID No. _____ Date _____

1. He around robbed that bank spread a easily (1)
 - A. That he robbed a bank spread around easily.
 - B. Around that bank he easily robbed a spread.
 - C. He easily robbed a bank around that spread.
 - D. He easily robbed a bank that around spread.
2. Register at we college the now must? (1)
 - A. Must register we at the college now?
 - B. Must we register at the college now?
 - C. Must we at the college register now?
 - D. Must we now at the college register?
3. To get a seat on the front row we arrived an hour early (1)
 - A. we arrived and hour early to get a seat on the front row.
 - B. On the front row we arrived an hour early to get a seat.
 - C. We to get a seat on the front row arrived an hour early.
 - D. An hour early to get a seat we arrived on the front row
4. Immediately the police report to please (1)
 - A. immediately report please to the police.
 - B. Please to the police report immediately.
 - C. Immediately please report to the police.
 - D. Please report immediately to the police.
5. Mammo dog the skinny killed (1)
 - A. Mammo the skinny dog killed.
 - B. Skinny dog killed the Mammo.
 - C. Skinny the dog Mammo killed
 - D. The skinny dog killed Mammo.
6. a) Form words do not always have meaning in themselves b) When you study. You often need to make short notes. c) Here are some useful suggestions to improve your study skill. d) Such words are called form words. e) To do this efficiently. You need to omit all unimportant words. (1)
 - A. b c a e d
 - B. c e d a b
 - C. c b e d a
 - D. d e a c b
7. a) Unfortunately, space is being polluted by debris from these space flights. b) On 4 October 1957 the first satellite, Spuntnik, was launched. c) More than 70,000 object have been left in space. d) Since then, thousands of spacecraft have been sent into space. e) Every few weeks new satellites are put into orbit. (1)
 - A. c e a d b
 - B. b d e a c
 - C. a d c b e
 - D. d a e c b
8. a) The gadget is really special one. b) It converts oral texts into written ones in seconds. c) Technology provides mankind with amazing gifts. d) Transcription is no more seen as an exhaustively boring job. e) Just play a talk and the print out is there on your desk in no time. (1)
 - A. c b e a d
 - B. c d a e b
 - C. c a b d e
 - D. c a d e b

9. *1. The middle school years (grades 7 and 8) are known to be the tough years. These are the years when the uneven pace of girls' and boys' physical, emotional, and cognitive development is most noticeable. Girls are a head of boys on all counts and both suffer. Educators debate whether separating boys and girls during these difficult years might improve students' academic performance. Separate classes are now prohibited in public schools that receive federal funds, but a change in the federal law that prohibits them is under consideration. Although some parents and parents and educators oppose same-sex classes, there is some evidence that separating boys and girls in middle school yields positive results. 2. Opponents of single-sex education claim that test scores of students in all-girls or all-boys classes are not higher than those of students in mixed classes. However, the research is inconclusive. Despite the fact that some research shows no improvement in test scores, other research shows exactly opposite results. More important, many psychologists believe that test scores are the wrong measuring sticks. They believe that self-confidence and self-esteem issues are more important than test scores. In same-sex classes, girls report increased confidence and improved attitudes towards math and science, for example. These are results that cannot be calculated by test but that will help adolescents become successful adults long after the difficult years of middle school are past. 3. New York University professor Carol Gilligan is certain that girls are more likely to be creative thinkers and risk-takers as adults if educated apart from boys in middle school. Boys, too, gain confidence when they do not have to compete with girls. Boys at this age become angry and fight back in middle school because they feel inferior when compared to girls, who literally "out-think" them. With no girls in the classroom, they are more at ease with themselves and more receptive to learning. 4. Opponents also maintain that separate classes or separate schools send the message that males and females cannot work together. They say that when students go into the work force, they will have to work side-by-side with the opposite sex, and attending all-girls or all-boys school denies them the opportunity to learn how to do so. However, such an argument completely ignores the fact that children constantly interact with members of the opposite sex, on chores, and privileges with their opposite-sex parent; children learn and practice on daily basis the skills they will need in their future workplaces. 5. The final argument advanced by opponents of same-sex education is that it is discriminatory and, therefore, unconstitutional. However, research supports exactly the opposite conclusion: that discrimination is widespread in mixed classes. Several studies have shown that boys dominate discussions and receive more attention than girls and that teachers call on boys more often than they call on girls, even when girls raise their hand. Clearly, this is discriminatory. 6. It should be evident that the arguments against same-sex classes are not valid. On the contrary, many people involved in middle-school education say that same-sex classes provide a better learning environment. Boys and girls pay less attention to each other and more attention to their schoolwork. Girls are more relaxed and ask more questions. They are also less disruptive and more focused. Girls are less fearful of making mistakes and asking questions in math and science. Boys, on the other hand, are less inhibited about sharing their ideas in language and literature. Furthermore, schoolchildren are not disadvantaged by lack of contact with the opposite sex because they have many opportunities outside the school setting to interact with one another. Finally, discrimination occurs in mixed classes, so discrimination is not a valid argument. Therefore, in my opinion, the law prohibiting same-sex classes in public schools should be changed.*

(1)

Which of the following statements is FALSE according to the information in the passage.

- A. Psychologists believe that self-confidence and self-esteem can be measured by test.
- B. Some research shows improvement in the test scores of students in single-sex classes.
- C. There is research to show no improvement in the test scores of students in single-sex classes.
- D. Positive adolescent attitude towards math and science helps them be successful later in life.

10. 1. The middle school years (grades 7 and 8) are known to be the tough years. - What does.... learn how to do so...(paragraph 4) refer to?
- A. Going into the work force
 - B. working with the opposite sex
 - C. children's interaction with parents
 - D. attending all-girls or all-boys schools

16. 1. In this era of the global community, more and more of us enjoy discussing different philosophies. Presently, there are as many different philosophies as there are cultures. One philosophic-type topic of unending interest is the question of whether or not animals have souls. Of course, most organized religions and philosophies have opinions on this question. One way to maintain your balance when discussing it is to keep an open mind and heart. You never know when a new viewpoint will change your thoughts around. Or at least, listening allows you to understand someone else's perspective. 2. A different approach to the question of whether or not animals have souls is found in the philosophy of Taoism: a Chinese belief system which includes the concepts of the yin and the yang energies. Taoism holds that embracing the natural flow of these energies, balanced and open to the path of life, creates harmony. Instead of making a definite statement, about the existence of animal souls, the way of Tao would look to the natural world for instruction. 3. There is story in the writing of Chuang Tzu, a spiritual leader in china, called "The Joy of Fishes" which begins with two men walking along a river, where they see fish leaping in the water. One of the men remarks on the happiness of the fish. The other man asks how, since the speaker is not a fish, he can know the fish are happy. The first man answers this way: "I know the joy of fishes in the river through my own joy, as I walk along the same river". The concept is that all beings truly share the walk along life's river experiencing the same kinds of joys and sorrows even though they are different beings. 4. A tale from the city of Edinburgh in Scotland, for example, illuminates this idea. Long ago in the 1850s, a little dog, Bobby by name, devoted himself to guarding the final resting place of his master- this was a grave in Grey friars Kirk graveyard. This he did for 14 years. The people of the city, likewise, noticed the dog's devotion and felt a connection with the loss and sorrow the dog experienced. They recognized the sorrow that comes to us all. 5. In the happier days of Bobby's life, he belonged to John Grey a policeman in the city of Edinburgh. Bobby, a Skye terrier, was Jock's steady companion in the city walking up and down the cobbled streets or standing at the policeman's post. Together, they braved the infamous Scottish weather, which was often damp and freezing. Source: Slightly adapted from cahsee language Arts, sample chapters

what does Bobby's example in paragraph 4 imply? It implies that

- A. animals have feelings like humans.
- B. Dogs prefer quiet places like graveyard.
- C. Dogs seem to be more loyal than humans,
- D. animals can endure sorrow better than humans.

17. *1. In this era of the global community, more and more of us enjoy discussing different philosophies. Presently, there are as many different philosophies as there are cultures. One philosophic-type topic of unending interest is the question of whether or not animals have souls. Of course, most organized religions and philosophies have opinions on this question. There is story in the writing of Chuang Tzu, a spiritual leader in china, called "The Joy of Fishes" which begins with two men walking along a river, where they see fish leaping in the water. One of the men remarks on the happiness of the fish. The other man asks how, since the speaker is not a fish, he can know the fish are happy. The first man answers this way: "I know the joy of fishes in the river through my own joy, as I walk along the same river". The concept is that all beings truly share the walk along life's river experiencing the same kinds of joys and sorrows even though they are different beings. 4. A tale from the city of Edinburgh in Scotland, for example, illuminates this idea. Long ago in the 1850s, a little dog, Bobby by name, devoted himself to guarding the final resting place of his master- this was a grave in Grey friars Kirk graveyard. This he did for 14 years. The people of the city, likewise, noticed the dog's devotion and felt a connection with the loss and sorrow the dog experienced. They recognized the sorrow that comes to us all. 5. In the happier days of Bobby's life, he belonged to John Grey a policeman in the city of Edinburgh. Bobby, a Skye terrier, was Jock's steady companion in the city walking up and down the cobbled streets or standing at the policeman's post. Together, they braved the infamous Scottish weather, which was often damp and freezing. Source: Slightly adapted from cahsee language Arts, sample chapters* (1)
- How is harmony achieved, according to Taoism?

- A. By making use of the yin.
- B. By applying the concept of the yang.
- C. By keeping the natural flow of the yin and the yang.
- D. By manipulating the balance between the yin and the yang.

18. 1. In this era of the global community, more and more of us enjoy discussing different philosophies. Presently, there are as many different philosophies as there are cultures. One philosophic-type topic of unending interest is the question of whether or not animals have souls. Of course, most organized religions and philosophies have opinions on this question. One way to maintain your balance when discussing it is to keep an open mind and heart. You never know when a new viewpoint will change your thoughts around. Or at least, listening allows you to understand someone else's perspective. 2. A different approach to the question of whether or not animals have souls is found in the philosophy of Taoism: a Chinese belief system which includes the concepts of the yin and the yang energies. Taoism holds that embracing the natural flow of these energies, balanced and open to the path of life, creates harmony. Instead of making a definite statement, about the existence of animal souls, the way of Tao would look to the natural world for instruction. 3.
