16. *changed. Political news that fills newspaper pages, TV screens and radio is reserved for Generation Y, an 'older' demographic.* (1)

Furthermore, Generation Z is both present and absent. It may be in front of somebody in person and simultaneously living vicariously through their cellphones. It is also known that Generation Z values quality of life, diversity and acceptance of individuality higher than any other generation. It does not know the world without the internet. Waking up at 10am and working on the couch until 10pm with breaks to watch TV shows is a much more motivating and productive work environment. This is much better than the traditional 8 - 5 desk job which was believed to be effective. Generation Y was thinking that a 'comfortable work environment increases output'. But Generation Z works fast and doesn't work unnecessarily hard. It is because their prerequisite for success is to work smart. These are the amazing changes time has shown. So, Generation Y has to start thinking outside the box in all the matters dealing with Generation Z and working with this generation as an opportunity rather than a threat.
