English, 2018 EC, entrance exam, version 5

Grade 12 · English · 2018 E.C.

Time allowed: 120 minutes

Questions: 201

Total marks: 201

Name _____ Grade _____ ID No. _____ Date _____

1. *James Baxter reviews two books about the internet: Rewire by Ethan Zuckerman, and Untangling the Web by Aleks Krotoski. Open a street map of any city and you see a diagram of all the possible routes one could take in traversing or exploring it. Superimpose on the street map the actual traffic flows that are observed and you see quite a different city: one of flows. The flows show how people actually travel in the city, as distinct from how they could. This helps in thinking about the internet and digital technology generally. In itself, the technology has vast possibilities, as several recent books emphasize, but what we actually wind up doing with it is, at any point in time, largely unknown. Ethan Zuckerman is excited by the possibilities the web provides for linking far-flung populations, for sampling different ways of life, for making us all digital cosmopolitans. His central thesis, however, is that while the internet does, in principle, enable everyone to become genuinely cosmopolitan, in practice it does nothing of the kind. As the philosopher Anthony Appiah puts it, true cosmopolitanism 'challenges us to embrace what is rich, productive and creative' about differences; in other words, to go beyond merely being tolerant of those who are different. Much of the early part of Rewire is taken up with demonstrating the extent to which the internet, and our use of it, fails that test. 'We shape our tools,' said the philosopher Marshall McLuhan, 'and afterwards they shape us.' This adage is corroborated every time most of us go online. We've built information tools (like search and social networking systems) that embody our biases towards things that affect those who are closest to us. They give us the information we think we want, but not necessarily the information we might need. Despite all the connectivity, we are probably as ignorant about other societies as we were when television and newspapers were our main information sources. In fact, Zuckerman argues, in some ways we were better then, because serious mainstream media outlets saw it as their professional duty to 'curate' the flow of news; there were editorial gatekeepers who determined a 'news agenda' of what was and wasn't important. But, as the internet went mainstream, we switched from curation to search, and the traditional gatekeepers became less powerful. In some respects, this was good because it weakened large multimedia conglomerates, but it had the unanticipated consequence of increasing the power of digital search tools - and, indirectly, the power of the corporations providing them. Zuckerman - a true cosmopolitan who co-founded a web service dedicated to realizing the net's capacity to enable anyone's voice to be heard - provides an instructive contrast to excessively optimistic narratives about the transformative power of networked technology, and a powerful diagnosis of what's wrong. Where he runs out of steam somewhat is in contemplating possible solutions, of which he identifies three: 'transparent translation' - simply automated, accurate translation between all languages; 'bridge figures' - bloggers who explain ideas from one culture to another; and 'engineered serendipity' - basically, technology for enabling us to escape from filters that limit search and networking systems. Eventually, the technology will deliver transparent translation; cloning Ethan Zuckerman would provide a supply of bridge figures, but, for now, we will have to make do with pale imitations. Engineering serendipity, however, is a tougher proposition. Aleks Krotoski might be able to help. She is a keen observer of our information ecosystem, and has been doing the conference rounds with an intriguing contraption called the 'Serendipity Engine', which is two parts art installation and one part teaching tool. Untangling the Web is a collection of 17 thoughtful essays on the impact of comprehensive networking on our lives. They cover the spectrum of stuff we need to think about - from the obvious (like privacy, identity and the social impact of the net) to topics which don't receive enough attention (for example, what medics, with a sniff, call 'cyberchondria' - how the net can increase health anxieties). Although she's a glamorous media 'star' (having fronted a TV series about the internet), people underestimate Krotoski at their peril. She's a rare combination of academic, geek, reporter and essayist, which her chapter on the concept of friendship online exemplifies: she's read what the key social theorists say on the subject, but she's also alert to what she experiences as 'emotional anemia' - 'the sense that....you might not feel the online love from the people you should, because your nearest and dearest may be drowned out in the ocean of sociability.' Which, in a way, brings us back to Zuckerman's thoughts about the difference between what networked technology could do and what it actually does.*

The reviewer starts with the symbol of a city map in order to illustrate the

- A. difficulty in understanding the complexity of the internet.
- B. degree to which the internet changes as time passes.
- C. difference between potential and real internet use.
- D. importance of the internet in people's lives today.

-
2. *Same passage as above* (1)
What do the words 'that test' in line 13 refer to?
- A. providing more widespread access to information
 - B. connecting in a substantial way with other cultures
 - C. establishing principles for developing the internet
 - D. accepting that not everyone in the world is the same
-
3. *Same passage* (1)
What point is made about the internet in the third paragraph?
- A. People often struggle to find what they are looking for on it.
 - B. It influences how people relate to family and friends.
 - C. All users have some responsibility for its evolution.
 - D. The way in which it works is far from neutral.
-
4. *Same passage* (1)
What does the reviewer suggest about Zuckerman in the fifth paragraph?
- A. His recommendations are less impressive than his analysis.
 - B. He uses terms that are harder to understand than need be.
 - C. He has the same failings that he identifies in other people.
 - D. His account of important developments is too negative.
-
5. *Same passage* (1)
Which of the following words is used to suggest disapproval? (paragraph 6)
- | | |
|----------------|----------|
| A. rounds | B. stuff |
| C. contraption | D. sniff |
-
6. *Same passage* (1)
What does the reviewer suggest about Aleks Krotoski in the final paragraph?
- A. Her insight into the nature of online friendship is perceptive.
 - B. She has been influenced by Ethan Zuckerman.
 - C. People are often misled by her academic credentials.
 - D. She takes on too many different roles.
-
7. *Same passage* (1)
The word 'adage' paragraph 3 means
- | | |
|-----------|-----------|
| A. Tool | B. Age |
| C. Gadget | D. Saying |
-
8. *Same passage* (1)
The phrase 'far-flung' paragraph 2 refers to
- | | |
|-----------|------------|
| A. Remote | B. Sampled |
| C. Close | D. Unknown |
-
9. *Same passage* (1)
Which one of the following is a possible title for the passage?
- | | |
|-----------------------|-----------------------|
| A. Rewire | B. The Internet Today |
| C. Untangling the Web | D. The web |

-
- 10. Same passage** (1)
- Which of the following is a technology for enabling us to escape from filters that limit search and networking systems?
- A. transparent translation B. bridge figures
C. engineered serendipity D. contemplating solution
-
- 11.** The sudden demise of the old political regime took the international community by surprise. (1)
- A. The sudden rebirth of the old political regime...
B. The sudden collapse and death of the old political regime...
C. The sudden strengthening of the old political regime...
D. The sudden compromise of the old political regime...
-
- 12.** The artist's unconventional methods, using industrial waste as a medium, challenged the art world. (1)
- A. The artist's traditional methods...
B. The artist's unorthodox and non-traditional methods...
C. The artist's haphazard methods...
D. The artist's theoretical methods...
-
- 13.** Without innovation, the company's growth began to stagnate, leading to an investor's anxiety. (1)
- A. ...began to accelerate rapidly...
B. ...began to become stagnant and stop developing...
C. ...began to fluctuate wildly...
D. ...began to compromise...
-
- 14.** The synergy between the marketing and design departments resulted in a highly successful campaign. (1)
- A. The conflict between the departments...
B. The combined power that produces a greater effect between the departments...
C. The independence of the departments...
D. The compromise between the departments...
-
- 15.** The negotiation was a compromise; neither side got everything they wanted, but both could accept the deal. (1)
- A. The negotiation was a total victory...
B. The negotiation was a complete failure...
C. The negotiation was a settlement of differences by mutual concession...
D. The negotiation was a hostile takeover...
-
- 16.** The company is seizing the opportunity to expand into emerging markets before its competitors. (1)
- A. The company is ignoring the opportunity...
B. The company is evaluating the opportunity...
C. The company is quickly and decisively taking advantage of the opportunity...
D. The company is compromising on the opportunity...
-
- 17.** His chronic procrastination meant he was always working against tight deadlines. (1)
- A. His chronic efficiency meant...
B. His chronic diligence meant...
C. His chronic hesitation and delay meant...
D. His chronic synergy meant...

-
- 18.** The ongoing investigations into the affair have yet to yield any conclusive evidence. (1)
- A. The ongoing formal inquiries and examinations have yet to yield any conclusive evidence.
 - B. The ongoing celebrations have yet to yield any conclusive evidence.
 - C. The ongoing negotiations have yet to yield any conclusive evidence.
 - D. The ongoing prototypes have yet to yield any conclusive evidence.
-
- 19.** We must prioritize the client's most critical needs before addressing minor requests. (1)
- A. We must ignore the client's most critical needs...
 - B. We must designate as less important the client's most critical needs...
 - C. We must treat as of highest importance the client's most critical needs...
 - D. We must compromise on the client's most critical needs...
-
- 20.** Climate change is a cross-cutting issue that affects, and is affected by, every sector of the economy. (1)
- A. ...an insignificant issue...
 - B. ...a pervasive issue that affects many areas...
 - C. ...an isolated issue...
 - D. ...a stagnant issue...
-
- 21.** The philosopher's essay was a critique of modern _____, arguing that the relentless pursuit of possessions empties life of deeper meaning. (1)
- A. consumerism
 - B. pesticides
 - C. synergy
 - D. conservation
-
- 22.** Despite the farmer's careful use of _____, a resilient strain of beetles began to devastate the crop. (1)
- A. consumerism
 - B. pesticides
 - C. prototypes
 - D. compromises
-
- 23.** Through the thick morning fog, the lookout on the ship could just barely _____ the outline of the distant coastline. (1)
- A. knock over
 - B. keep off
 - C. descry
 - D. result in
-
- 24.** The alarming data on plastic pollution in the oceans has led many scientists to _____ an immediate and global reduction in single-use plastics. (1)
- A. keep off
 - B. call for
 - C. knock over
 - D. descry
-
- 25.** The historian argued that the treaty's punitive conditions would _____ economic instability and, ultimately, a second conflict. (1)

- A. are going to get
B. will get
C. will have got
D. get
-
66. Teshale: I am interested in drama. What are you good? Senait: I am good _ poetry. (1)
- A. by
B. with
C. at
D. about
-
67. 'It's time I helped my mother.' This is equivalent with: (1)
- A. I have helped my mother
B. I still don't help my mother
C. I helped my mother
D. I am not helped my mother
-
68. I wish they _ the entrance examination. They studied Bid Bang Theory. (1)
- A. wouldn't pass
B. hadn't passed
C. passed
D. had passed
-
69. You haven't done a home work since September, so you are too _. (1)
- A. careless
B. careful
C. useless
D. hopeful
-
70. The milk which was in the bottle was sour. This is the same as: (1)
- A. Some bottle of the milk was sour.
B. None bottle of the milk was sour.
C. All bottle of the milk was sour.
D. One bottle of milk was sour.
-
71. Sport is _ in many schools, but it is compulsory here. (1)
- A. operational
B. professional
C. optional
D. practical

72. When the time he graduates, he _ marry his classmate. (1)

83. What they are doing is not relevant _ the instruction in the book. (1)

- A. with B. about
C. to D. of

84. Please ask if they haven't mailed the document _ It should be here by Monday. (1)

- A. still B. now
C. till D. yet

85. There are many occasions in which seat belts save life, yet _ drivers often wear them. (1)

- A. may B. a lot of
C. a few D. few

86. I'm not superstitious, but you _ something earlier than brought you this bad luck. (1)

- A. should have to do B. would have done
C. might have been doing D. must have done

87. We don't know why he suspected us. _ from among us would want his money. (1)

- A. Anyone B. No one
C. Not any one D. Not some one

88. We had _ tea, but there wasn't _ sugar. What shall we do? (1)

- A. some/any
B. any/some
C. much/many
D. a little/a few

89. She is genuinely broke, _ we have to contribute some for her. She is our friend. (1)

- A. consequently B. so
C. because of D. so as to

90. The purchasers should be accountable for what happened. _ piece is faulty. (1)

-
- 112.** Baysa: Hello, where do you live? Alemitu: _____ (1)
- A. I'm from Jimma. B. I live with my sister.
C. I come by bus D. Around Arat kilo.
-
- 113.** Yonas: Are you married, Zahara? Zahara: _____ (1)
- A. Before three years B. I'm 30
C. No, I am not. D. I have a boy friend
-
- 114.** Secretary: How do you do, Sir? Visitor: _____ (1)
- A. How do you do? B. I am fine. How do you do?
C. I am fine. How are you? D. Very well, how do you do?
-
- 115.** Ali: _____ Almaz: That sounds reasonable. (1)
- A. Shall we go for coffee. B. Is mini doing her homework?
C. Did she buy a new purse? D. Isn't Abera coming this evening?
-
- 116.** Fasil: Why did you leave the party early last night? Rahel: _____ (1)
- A. I didn't feel well. B. I left at 10 o'clock.
C. I left with my husband. D. We had a great evening.
-
- 117.** Teacher: We are on page 50, aren't we? Student: _____ (1)
- A. No, exercise 5. B. Yes, exercise 4.
C. Yes, we have done it. D. No, we haven't done it.
-
- 118.** Hanna: _____ Kedija: Kind of, I suppose. (1)
- A. Where is your boyfriend? B. Here comes your boyfriend.
C. Do you love your friend? D. What does your boyfriend do for living?

- 119. Sustainable Development in the Ethiopian Context** *Ethiopia, a nation renowned for its ancient history and cultural heritage, stands at a pivotal crossroads in the 21st century. The pursuit of sustainable development here is a complex but essential endeavor, uniquely shaped by its environmental challenges, economic ambitions, and rich social tapestry. The nation's growth is predominantly agrarian, with a significant portion of its population relying on rain-fed agriculture. This makes it highly vulnerable to the impacts of climate change, such as erratic rainfall patterns and land degradation, which threaten both food security and economic stability. In response, Ethiopia has embarked on an ambitious green development path. The cornerstone of this strategy is the Climate-Resilient Green Economy (CRGE) strategy, launched in 2011. Its primary goal is to achieve middle-income status by 2025 while developing a green economy. This involves a four-pronged approach: protecting and reforesting lands, expanding renewable energy production, adopting climate-resilient agricultural practices, and advancing green technology in industries. Massive investments in hydroelectric, wind, and solar power, like the Grand Ethiopian Renaissance Dam (GERD), aim not only to provide domestic energy but also to position Ethiopia as a regional power exporter. However, the path is fraught with challenges. Rapid population growth exerts immense pressure on natural resources. Balancing immediate economic needs, such as employment creation and poverty reduction, with long-term environmental goals remains a delicate act. Furthermore, ensuring equitable development across diverse regions and ethnic groups is crucial for social sustainability. The success of these initiatives hinges on effective governance, community involvement, and continued international support. For Ethiopia, sustainable development is not merely an option; it is an imperative for ensuring the well-being of its present and future generations, preserving its environment, and maintaining its unique cultural identity.* (1)

What is the main purpose of the passage? (Sustainable Development in Ethiopia)

- A. To detail the ancient history of Ethiopia.
- B. To explain the challenges and strategies of sustainable development in Ethiopia.
- C. To argue for international aid to Ethiopia.
- D. To describe the tourist attractions of Ethiopia.

- 120. same passage** (1)

According to the passage, why is Ethiopia's economy particularly vulnerable to climate change?

- A. Because it has no coastline.
- B. Because it relies heavily on rain-fed agriculture.
- C. Because its population is too small.
- D. Because it lacks modern technology.

- 121. same passage** (1)

What is the primary goal of Ethiopia's Climate-Resilient Green Economy (CRGE) strategy?

- A. To become the world's largest exporter of coffee.
- B. To achieve middle-income status by 2025 with a green economy.
- C. To reduce its population growth rate.
- D. To build the largest dam in Africa.

- 122. same passage** (1)

Which of the following is NOT listed as a part of the CRGE's four-pronged approach?

- A. Expanding renewable energy.
- B. Building larger cities.
- C. Protecting and reforesting lands.
- D. Advancing green technology.

-
- 123. same passage** (1)
What is mentioned as a major challenge to sustainable development in Ethiopia?
- A. A lack of ancient cultural heritage.
 - B. An excess of renewable energy.
 - C. Rapid population growth pressuring resources.
 - D. Too much international support.
-
- 124. same passage** (1)
In the context of the passage, what does 'pivotal crossroads' (Paragraph 1) most likely mean?
- A. A busy traffic intersection.
 - B. A critical point of decision.
 - C. A historical monument.
 - D. A geographical location.
-
- 125. same passage** (1)
The word 'erratic' in the phrase 'erratic rainfall patterns' (Paragraph 1) means:
- A. Predictable and reliable.
 - B. Unpredictable and irregular
 - C. Heavy and constant.
 - D. Light and gentle.
-
- 126. same passage** (1)
What is the best meaning of 'cornerstone' as used in 'The cornerstone of this strategy...' (Paragraph 2)?
- A. A decorative rock.
 - B. The most important part.
 - C. The cheapest component.
 - D. An ancient artifact.
-
- 127. same passage** (1)
The word 'equitable' in 'ensuring equitable development' (Paragraph 3) means:
- A. Fast and rapid.
 - B. Fair and impartial.
 - C. Profitable and commercial.
 - D. Urban and modern.
-
- 128. same passage** (1)
What does 'fraught with' in the phrase 'the path is fraught with challenges' (Paragraph 3) imply?
- A. The path is free from challenges.
 - B. The path is full of challenges.
 - C. The path is alongside challenges.
 - D. The path is made easier by challenges.
-
- 129. same passage** (1)
In the first paragraph, what does the pronoun 'This' refer to in the sentence: 'This makes it highly vulnerable...'?
- A. Ethiopia's ancient history.
 - B. The cultural heritage.
 - C. The nation's growth being predominantly agrarian.
 - D. The 21st century.
-
- 130. same passage** (1)
In the second paragraph, what does the pronoun 'Its' refer to in the sentence: 'Its primary goal is to achieve...'?
- A. Ethiopia's goal.
 - B. The Grand Ethiopian Renaissance Dam's (GERD) goal.
 - C. The Climate-Resilient Green Economy (CRGE) strategy's goal.
 - D. Renewable energy's goal.

-
- 131. same passage** (1)
In the second paragraph, what does the pronoun 'This' refer to in the sentence: 'This involves a four-pronged approach...'?
A. Achieving middle-income status. **B.** Developing a green economy.
C. The goal of the CRGE strategy. **D.** Launching the strategy in 2011.
-
- 132. same passage** (1)
In the third paragraph, what does the pronoun 'Its' refer to in the phrase: 'preserving its environment'?
A. The international community's environment.
B. Ethiopia's environment.
C. The present generation's environment.
D. The agriculture's environment.
-
- 133. same passage** (1)
In the final sentence, what do the pronouns 'its' and 'it' refer to? 'For Ethiopia, sustainable development is not merely an option; it is an imperative for ensuring the well-being of its present and future generations...'
A. its = the present generation's; it = the well-being
B. its = Ethiopia's; it = sustainable development
C. its = the option's; it = an imperative
D. its = the future's; it = Ethiopia
-
- 134.** She ... to her kids and parents. (1)
A. gave the day back **B.** gave the day up
C. gave the day through **D.** gave the day over
-
- 135.** I'm ill and feel very weak. I have to ... (1)
A. call the meeting back **B.** call the meeting around
C. call the meeting off **D.** call the meeting down
-
- 136.** She ... Matt's name ... when she made a wedding guest list. (1)
A. did/without **B.** left/out
C. broke/out **D.** took/off
-
- 137.** My manager wants me ... the report ... (1)
A. to drop/out **B.** to come/again
C. to do/over **D.** to fill/in
-
- 138.** Steven ... He failed to keep his word. (1)
A. let me down **B.** left me out
C. broken me down **D.** backed me out
-
- 139.** He was so loud and noisy in the morning that I had to get up and ... (1)
A. get along with him **B.** turn him out
C. figure him out **D.** chew him out
-
- 140.** The film was so tedious that she ... during it. (1)
A. dropped in **B.** nodded off
C. held down **D.** fell down

141. She always supports me. She ... over my decision to move to London. (1)

- A.** cheered me up **B.** brought me up
C. backed me up **D.** held me up

142. He ... but nobody told him how to get to the park. (1)

- A.** asked out **B.** asked around
C. called around **D.** checked out

143. After the scandal, the CEO tried to ... the rumors by holding a press conference, but few believed his explanations. (1)

- A. put down B. put across
C. put to rest D. put through

144. She's very good at ... complex ideas in a way that even beginners can understand. (1)

- A. putting aside B. putting across
C. putting up D. putting off

145. We need to ... some money every month for our daughter's future education. (1)

- A. put out B. put down
C. put aside D. put up with

146. As a historian, she spends her days ... information from ancient manuscripts. (1)

- A.** looking up to **B.** looking after
C. looking for **D.** looking into

147. He really ... his uncle, who was a self-made and respected entrepreneur. (1)

- A. looks into B. looks down on
C. looks after D. looks up to

148. It took me weeks to ... the flu I caught on holiday. (1)

- A. get over B. get away with
C. get by D. get through

149. He managed to ... not doing any work for months by blaming IT issues. (1)

- A. get over B. get away with
C. get through D. get by

150. It was a tough year, but we managed to ... it by supporting each other. (1)

- A. get over B. get away with
C. get by D. get through

151. The striking workers won't ... until their demands for a pay rise are met. (1)

- A. back up** **B. back off**
C. back down **D. back out**

152. I promised I would help him move, and I can't ... now at the last minute. (1)

- A. back up B. back off
C. back down D. back out

153. Can you ... your argument with some solid data? I'm not convinced yet.

(1)

- A. back up
- B. back off
- C. back into
- D. back down

154. *There are two types of diabetes, insulin-dependent and non-insulin dependent. Between 90-95% of the estimated 13-14 million people in the United States with diabetes have non insulin dependent, or Type II, diabetes. Because this form of diabetes usually begins in adults over the age of 40 and is most common after the age of 55, it used to be called adult-onset diabetes. Its symptoms often develop gradually and are hard to identify at first; therefore, nearly half of all people with diabetes do not know they have it. For instance, someone who has developed Type II diabetes may feel tired or ill without knowing why. This can be particularly dangerous because untreated diabetes can cause damage to the heart, blood vessels, eyes, kidneys, and nerves. While the causes, short-term effects, and treatments of the two types of diabetes differ, both types can cause the same long-term health problems. Most importantly, both types affect the body's ability to use digested food for energy. Diabetes does not interfere with digestion, but it does prevent the body from using an important product of digestion, glucose (commonly known as sugar), for energy. After a meal, the normal digestive system breaks some food down into glucose. The blood carries the glucose or sugar throughout the body, causing blood glucose levels to rise. In response to this rise, the hormone insulin is released into the bloodstream and signals the body tissues to metabolize or burn the glucose for fuel, which causes blood glucose levels to return to normal. The glucose that the body does not use right away is stored in the liver, muscle, or fat. In both types of diabetes, however, this normal process malfunctions. A gland called the pancreas, found just behind the stomach, makes insulin. In people with insulin-dependent diabetes, the pancreas does not produce insulin at all. This condition usually begins in childhood and is known as Type I (formerly called juvenile-onset) diabetes. These patients must have daily insulin injections to survive. People with non-insulin-dependent diabetes usually produce some insulin in their pancreas, but their bodies' tissues do not respond well to the insulin signal and, therefore, do not metabolize the glucose properly, a condition known as insulin resistance. Insulin resistance is an important factor in non-insulin dependent diabetes, and scientists are searching for the causes of insulin resistance. They have identified two possibilities. The first is that there could be a defect in the insulin receptors on cells. Like an appliance that needs to be plugged into an electrical outlet, insulin has to bind to a receptor in order to function. Several things can go wrong with receptors. For example, there may not be enough receptors to which insulin may bind, or a defect in the receptors may prevent insulin from binding. The second possible cause of insulin resistance is that, although insulin may bind to the receptors, the cells do not read the signal to metabolize the glucose. Scientists continue to study these cells to see why this might happen. There's no cure for diabetes yet. However, there are ways to alleviate its symptoms. In 1986, a National Institute of Health panel of experts recommended that the best treatment for non-insulin dependent diabetes is a diet that helps one maintain a normal weight and pays particular attention to a proper balance of the different food groups. Many experts, including those in the American Diabetes Association, recommend that 50-60% of daily calories come from carbohydrates, 12-20% from protein, and no more than 30% from fat. Foods that are rich in carbohydrates, like breads, cereals, fruits, and vegetables, break down into glucose during digestion, causing blood glucose to rise. Additionally, studies have shown that cooked foods raise blood glucose higher than raw, unpeeled foods. A doctor or nutritionist should always be consulted for more of this kind of information and for help in planning a diet to offset the effects of this form of diabetes.*

(1)

According to the passage, what may be the most dangerous aspect of Type II diabetes? (Diabetes passage, question 229 in original numbering)

- A. Insulin shots are needed daily for treatment of Type II diabetes.
- B. Type II diabetes may go undetected and, therefore, untreated.
- C. In Type II diabetes, the pancreas does not produce insulin.
- D. Type II diabetes interferes with digestion.

-
- 155. same diabetes passage** (1)
- Which of the following are the same for Type I and Type II diabetes?
- A. Treatments
 - B. long-term health risks
 - C. short-term effects
 - D. causes
-
- 156. same passage** (1)
- Which of the following is the main function of insulin?
- A. It signals tissues to metabolize sugar.
 - B. It breaks down food into glucose.
 - C. It carries glucose throughout the body.
 - D. It binds to receptors.
-
- 157. same passage** (1)
- Which of the following statements best summarizes the main theme of the passage?
- A. Type I and Type II diabetes are best treated by maintaining a high-protein diet.
 - B. Type II diabetes is a distinct condition that can be managed by maintaining a healthy diet.
 - C. Type I diabetes is an insidious condition most harmful when the patient is not taking daily insulin injections.
 - D. Adults who suspect they may have Type II diabetes should immediately adopt a high carbohydrate diet.
-
- 158. same passage** (1)
- Which of the following is mentioned in the passage as a possible problem with insulin receptors in insulin-resistant individuals?
- A. Overeating causes the receptors to function improperly.
 - B. There may be an overabundance of receptors present.
 - C. A defect causes the receptors to bind with glucose.
 - D. A defect hinders the receptors from binding with insulin.
-
- 159. same passage (paragraph 4: 'They have identified two possibilities.')** (1)
- 'They' paragraph four line two refers to
- A. Scientists
 - B. Non-insulin dependent diabetes
 - C. Insulin resistance
 - D. Insulin receptors
-
- 160. same passage** (1)
- According to the passage, in normal individuals, which of the following processes occur immediately after the digestive system converts some food into glucose?
- A. The glucose is metabolized by body tissues.
 - B. Insulin is released into the bloodstream.
 - C. Blood sugar levels rise.
 - D. The pancreas manufactures increased amounts of insulin.
-
- 161. same passage** (1)
- Based on the information in the passage, which of the following best describes people with Type I diabetes?
- A. They do not need to be treated with injections of insulin.
 - B. They comprise the majority of people with diabetes.
 - C. Their pancreases do not produce insulin.
 - D. They are usually diagnosed as adults.

-
- 162.** *same passage* (1)
What is the closest meaning of the underlined word 'offset' in the final sentence of the passage?
- A. counteract
B. cure
C. soothe
D. erase
-
- 163.** 'I regret to inform you that we are unable to offer you a post at this time.' This is mostly taken from a letter of (1)
A. rejection
B. complaint
C. enquiry
D. apology
-
- 164.** 'Love is a very powerful force; it conquers barriers of color, race, religion, and culture. It thrives on mutual (1)
nurturing of each other,' it is very likely that the writing is:
A. argumentative
B. narrative
C. descriptive
D. expository
-
- 165.** What would be an appropriate ending for Yohannes, a graduate, who is writing a job application letter? (1)
A. With best regards,
B. Faithfully yours,
C. Hopefully,
D. Truly yours,
-
- 166.** Of the following sentences which is correctly punctuated? (1)
A. Unpredictably, Dr. Belete, academic dean, college of science is so much assertive.
B. Unpredictably Dr. Belete, academic dean, college of science, is so much assertive.
C. Unpredictably, Dr. Belete, Academic dean college of science, is so much assertive.
D. Unpredictably, Dr. Belete, Academic Dean, College of Science, is so much assertive.
-
- 167.** 'Considering the pressure of today's society on marriage and family, remaining single is a difficult and (1)
courageous decision, but one that could ensure happiness and contentment throughout life.' This piece of
writing is most likely:
A. narrative
B. descriptive
C. argumentative
D. expository
-
- 168.** 'I have worked in a hospital for many years. The hospital is called Tikur Anbassa; a big combined hospital which (1)
is located in the capital of Ethiopia and provides every kind of services to residents 24 hours a day. This is the
best hospital that I have ever been a part of. I am very glad I have worked in this good environment.' which piece
of writing will be best conclusion for the above essay?
A. The co-workers will keep helping patients until they recover.
B. This is a good hospital for everyone who needs to go there.
C. I devote my knowledge to all of the patients.
D. All workers are very kind to help patients.
-
- 169.** Which one of the following piece of writing is a type of argumentative essay? (1)
A. Animals should not be used for laboratory tests.
B. Meanwhile, I packed up my little hospital until another day.
C. Computers can be used for specialized fields as well.
D. Bahir Dar has a beautiful, big and colorful lake called Tana.

-
170. 'As we can see from the above, farmers are more important than doctors for Ethiopian sovereignty.' This is most likely taken from the section of an essay. (1)
- A. body
B. introduction
C. discussion
D. conclusion
-
171. 'Yesterday evening I got home from school around four o'clock. My mother had dinner prepared which we eat as soon as my elders came home from work.' This piece of writing most likely taken from a type of essay. (1)
- A. descriptive
B. expository
C. narrative
D. persuasive
-
172. Which one of the following IS a type of descriptive essay? (1)
- A. His dirty bike was plastered with wet and sticky mud.
B. Non-organic gardeners avoid broad spectrum pesticides as possible.
C. Laws should restrict where people can smoke as research proves that only harm.
D. A terrible storm blew up to fifty miles an hour and it rained very hard last night.
-
173. 'Here, the potter kneads the clay to prepare it for throwing. Wedging can't be rushed. A minimum of fifty turns is required to rid the clay of air pockets and align its molecules. Once wedged and formed into a ball, the clay is thrown on to the center of a potter's wheel. The material must be centered. Centering not only takes strength but time as well.' Which one is the best title for the above entitled discussion? (1)
- A. The process of making pottery.
B. The use of making pottery.
C. The process of exchanging material of pottery.
D. Material to make pottery.
-
174. 'Buckle your seat belt!' This is a warning for (1)
- A. school
B. transport
C. hospital
D. market
-
175. Which one of the following sentences has a correct punctuation? (1)
- A. He said, "Every term has its meaning"; however, we didn't know what it meant.
B. He said, "Every term has its meaning;" however, we didn't know what it meant.
C. He said, "every term has its meaning;" however, we didn't know what it meant.
D. He said "Every term has its meaning." however, we didn't know what it meant.
-
176. Which one of the following sentences is most likely taken from descriptive writing? (1)
- A. We were walking around the apartment.
B. There were people who cleaned the apartment daily.
C. The apartment was so attractive when seen from distance.
D. They were renovating the apartment when we had our meeting.
-
177. 'Mr. Wolf went out hunting in the forest one dark murky night.' This article is most likely to be a/an text. (1)
- A. descriptive
B. argumentative
C. narrative
D. expository
-
178. What would be an appropriate ending for Telaye, a graduate, who is writing an application letter for a job? (1)
- A. Sincerely yours
B. Hopefully
C. Yours for ever
D. Affectionately

179. 'The red-eye bloody vampire flushed his teeth into the soft skin of his lover and ended her life.' This article is most likely to be an/a text. (1)
- A. argumentative
B. expository
C. descriptive
D. narrative
180. Arrange: a. Dallol is found in the Afar Region of Ethiopia. b. It is one of the lowest and hottest areas of the world. c. Temperatures can reach as high as 450c in the June. d. This makes the place very difficult for wildlife to live and vegetation to grow. e. There is no rain for most of the year, and the highest annual rainfall is only 200mm. (1)
- A. cabed
B. abced
C. cead
D. ecabd
181. Arrange: a. And most important of all, he is not a politician. b. He is not a writer. c. He cannot be otherwise. d. Or he is not a commentator. e. A reporter is just that _a reporter. (1)
- A. abcd
B. eabcd
C. ecbda
D. ecabd
182. The scientist's research was considered ; it fundamentally challenged the existing paradigm. (1)
- A. extraordinary
B. revolutionary
C. paradigmatic
D. evolutionary
183. His fear of being in open or crowded spaces made him utterly . (1)
- A. hydrophobic
B. claustrophobic
C. agoraphobic
D. xenophobic
184. The dictator's rule was marked by absolute authority and the suppression of dissent. (1)
- A. autonomous
B. democratic
C. autocratic
D. bureaucratic
185. The novel's protagonist was a classic , a wanderer with no fixed home. (1)
- A. immigrant
B. itinerant
C. peregrination
D. migrant
